

ALEXANDER MERVAR

Technology Consultant — Workday AMS, Integrations & Client Advisory

Indianapolis, IN · alexandermervar@gmail.com · alexandermervar.com · linkedin.com/in/alexander-mervar · github.com/alexandermervar

SUMMARY

Technology consultant in the Workday ecosystem, working where client advisory meets hands-on delivery. Over three years I've advised 10+ AMS engagements, contributed to 5+ Workday implementations, and built a large library of Core Connector and EIB integrations. Helped stand up an AMS practice from the ground up — advising clients and designing the internal systems and workflows that keep delivery on track. Promoted to Senior Consultant in 2026.

EXPERIENCE

Impact Advisors — Senior Consultant

Feb 2026 – Present · Chicago, IL (Remote)

- Helped stand up the firm's Workday AMS practice from the ground up — shaping how a young practice intakes, triages, staffs, and delivers client requests.
- Serve as client advisor across AMS engagements (10+ supported over my career), owning the client relationship and routing incoming work to the right functional leaders.
- Built the internal documentation, SOPs, and workflows that keep delivery on track and meet request-turnaround commitments.
- Led management of the Workday 2026R1 release for AMS clients; hosted public-facing webinars for customers and partners (~30 attendees each) and an enablement lunch-and-learn on Object Transporter (OX).
- Co-led integrations office hours for the nearshore delivery team, raising delivery consistency and unblocking work.

Impact Advisors — Consultant

Aug 2023 – Feb 2026 · Chicago, IL (Remote)

- Led Workday configuration, integration, and reporting initiatives for large healthcare organizations; contributed to 5+ implementations and built a large library of Core Connector integrations and EIBs.
- Coordinated downstream integration testing across Symplr, PayScale, HealthStream, CBiz, and Strata (5 systems) for the Emory go-live; led Emory job-profile consolidation.
- Built an internal integration analytics tool and authored ~5 SOPs (3 published) that became the practice's reference material for request intake and delivery.
- Managed error-queue resolution, tenant build audits, and change readiness to streamline post-production support and ensure governance compliance.

Abbott Laboratories — IT Intern

May 2022 – Aug 2022 · Lake County, IL

- Project-managed an internal automation initiative; gathered requirements for a mobile-app prototype and facilitated Lean / Six Sigma workshops. Presented an internal training webinar to an audience of ~1,000 employees.

Indiana University, UITS — Consultant Supervisor

Nov 2019 – May 2023 · Bloomington, IN

- Supervised 5–10 consultants per shift across 58 campus computer labs; trained staff on hardware/software troubleshooting. Awarded Consultant of the Month.

SKILLS

Workday · Application Management Services (AMS) · Client Advisory · Business Process Improvement · Workday Integration · Project Management · Stakeholder Management · Reporting · SLA / Service Management · Python · Java · XSLT · Git · Docker
